

- You can**
- Share your life experiences in real time!
  - Capture video and upload to your favorite blog.

1. Press **Multimedia** > **Video Camera** to see the video viewfinder.  
Press **Up** or **Down** to view camera settings.  
Press **Left** or **Right** to change settings.  
**Tip:** Press **Options** > **Audio On/Off** to turn audio recording on/off.
2. Point the camera at the video subject and press **Start**. To stop recording, press **Stop**.  
**Tip:** During video capture, press **Pause** to pause the recording, and press **Play** again to resume recording.
3. To save the video, press **Options** > **Save Only**.  
**Shortcut:** Press **Save** quickly to store the video. This shortcut only works when the auto-save feature is turned off. To turn off the auto-save feature, press **Multimedia** > **Camera** > **Options** > **Camera Settings** > **Auto-Save** > **Disable**.
4. To share your videos with family and friends, select **Web Access**, then launch your favorite video blogging service, such as YouTube. Log in to your service.
5. In the blogging service, select the option to upload a video. Then scroll to fill in information about the video such as title and description.
6. In the blogging service, choose the option to select a video. Select the **Videos** folder on your phone, then select the video to upload.
7. In the blogging service, fill in any remaining information about the video and upload the video. When the video has successfully uploaded, a confirmation message appears.
