DVDO AIR

New 60 GHz Wireless HDMI - Interference-Free Full Uncompressed HD Video + 7.1 Channel Surround Sound

In the competitive field of wireless A/V solutions DVDO Air™ is the only high-definition wireless transmission system that works reliably across a large room with fully compliant HDMI® (including CEC remote control and 3D), and costs barely more than a high-performance HDMI cable. **DVDO Air's 60GHz wireless technology uses radio wave frequencies more than ten times higher than other wireless devices like cordless phones, cell phones and Wi-Fi. The advantages of 60GHz technology include more bandwidth (enough to carry uncompressed 1080p HD video and 7.1 channel surround sound), and signal isolation (60GHz signals do not pass through walls.) Since 60GHz is a different radio band from other wireless signals, there is no interference. 60GHz Wireless for HDMI signal transmission is reliable, robust, error-free and suitable for even the most demanding high-performance home theaters.** Best of all, DVDO Air can be sold as a customer-installed DIY accessory, or be specified by professional installers to achieve higher margins on full-service installations.

KEY FEATURES:

- Connects a HDMI source (such as Blu-ray, cable or satellite box, notebook PC, Audio/ Video receiver, DVR) to a DTV without wires between them.
- Full HDMI compliance includes 3D and Consumer Electronics Control (CEC), which enables the DTV remote to control the source device. It's HDCP compliant as well.
- 60 GHz wireless technology provides bandwidth for full 1080p (uncompressed video) and 7.1 surround sound.
- Easy installation — just connect transmitter to source, and receiver to an HDMI port on the DTV.
- No interference with other wireless devices, which use much lower frequencies (including Wi-Fi at 2.4 GHz, cordless phones at 5.8 GHz, and cell phones at around 2 GHz).
- Exclusive DVDO Air receiver mounting clip attaches to wall or to top of DTV, maximizing range and making installation easy.
- Transmission distance 10 meters/33 feet.

DVDO AIR

WHY YOU WANT TO INTEGRATE WITH THE DVDO Air:

- Wireless for HDMI 60 GHz technology can work flawlessly.
- Increase margins on DTV, Blu-ray, and home theater sales with this attachment sale that solves a real customer problem.
- Works as both a do-it-yourself item and custom installations.
- Repeat business opportunity: 60 GHz won't pass through walls, so customers can install DVDO Air in every room.
- Customers seeking longer HDMI cables or HDMI cable extenders will find DVDO Air an attractive alternative.
- DVDO Air offers an integrated home theater line, which includes input switching and scaling components to ensure HDMI compliance throughout the signal chain.

THE AIR ALL-IN-ONE SOLUTION INCLUDES:

- DVDO Air wireless transmitter with AC power supply
(Shown above)
- DVDO Air Wireless receiver with AC power supply
(Shown above)
- DVDO Air Wall/DTV receiver mounting clip

INTERNATIONAL STANDARDS

- EMC: USA: FCC Compliant Part 15B; Canada ICES-003 & Eur. Union CE 301 489-1 & -3
- EMF: European Union CE EN62311
- RF: USA FCC Part 15C; Canada IC RSS 210; E.U. CE EN 302 567;
- Global standard for 60 Hz IEEE 802.15.3c specifications

Product Name: DVDO Air

Manufacturer: DVDO, Inc.

Brand Name: DVDO

Manufacturer Part Number: DVDOAir-P

Master Pack: 10 units

UPC Code: 880802000053

L x W x H: 9.5"x8"x3"

Weight: 2 lbs
